

Glide™

- Glide™ is a clear nano-ceramic coating that is both extraordinarily slick and hydrophobic. Its low-stick quality helps keep dirt and debris from building up in areas that can be a problem. It has multiple applications and beneficial uses on archery components.
- The application process for Glide™ is straightforward and is ideal for manufacturers and custom coating shops. Wipe on Glide™ to your intended surface and allow it to dry. It may be lightly buffed or removed with a microfiber towel if needed. Warmer airflow will reduce the time required to reach a “dry to the touch” state. Exposure to direct sunlight or warmer ambient air will reduce the time needed to achieve a fully cross-linked cure.

The manufacturer is not responsible for the use and application of this material. It is up to the end-user to determine the suitability of this product for their application. It is the belief that this document's contents are accurate at the time of printing. No warranty is written or implied regarding application and use.

Spartan chemistry is the most advanced "optimizing" chemistry on the planet!

We optimize and maximize the performance of Firearms, Fishing Reels, Engines, Bladed and Machining Tools with our super cleaners and lubricants for various consumer, commercial, and industrial markets. We also offer proprietary specialty coatings and unique natural formulas to enhance productivity for farmers and growers. Our products are safe, green, American-made, different from and significantly outperforming the competition.
