

Slickblade Base™

Slickblade Base™ is a pre-sealer base coat for heat-treated or ground blades before applying Slickblade™. It is used to fill and seal microporosity on the blade's surface. It is also safe for use with food contact surfaces.

- Apply Slickblade Base™, then wait 24 hours or longer at room temperature before top coating.
- Dry to touch is 15-25 minutes at room temperature.
- A complete cure takes five days. Apply Slickblade™ as a thin wet film after 24 hours by gently wiping the formula on with little to no pressure.
